# MORE OF OUR WORK

- **PAYPAL LIKE WEB SERVICE** - Client's product powers payments for online and in-person retailers, subscriptions businesses, software platforms and marketplaces, and everything in between. This service provides visibility through the portal that can be accessed from any browser and any device. We bring together everything that's required to build payment infrastructure, websites and apps that accepts payment in one of the African countries. As a result, a payment gateway for different banks and payment systems was created successfully and our client became a pioneer in the industry.
- **BIG DATA** - Client's system makes a calculations of the best setup of the voltage transformer depend on the input and output params. During the calculations applications operating with trillions of calculations, generating hundreds gigabytes of logs and data in DB. We developed a solution that speeded up the calculation of the required characteristics for electrical transformers. As a result, this solution has reduced computation time by several hundred times.
- **B2B SOLUTION FOR SALES** - complex platform: native mobile apps, desktop, web extensions and separate web CRM for sales representatives, deeply integrated with a sales force. We created a set of plugins for Gmail-chrome, outlook, office 365 (cross-platform), IOS and Android applications. Also, the ecosystem includes two sites, one repeat functionality of plugins, and the other for detailed analytic. As a result, complex platform was created successfully.

# STARTUPS

We do a research on your business, develop architecture, prioritize tasks and develop a stable, high-quality product for you.

**B2B SOLUTION** - platform where owners of startups, investors and connectors can make effective cooperation. Our main responsibility was a development of the API based on restful architecture combining classic and OData approaches; implementation of frontend part using the newest Microsoft frameworks, Blazor, Web Assembly and .NET 5

**B2B SOLUTION** - our client was a USA startup in the industry of sales. We created complex platform for sales representatives, deeply integrated with a salesforce applications that helps to do work faster and more effective. As a result, complex platform was created successfully and our client became a pioneer in this industry.
